

ECOMBIO CART DRAWER + PRE-CHECKOUT UPSELL FUNNEL

IMPLEMENTATION PRD + SOP

You are implementing a production-ready Shopify cart system for the ECOMBIO theme.

Do NOT create a prototype, mockup, wireframe, or conceptual example.

Generate actual Shopify Liquid, JavaScript, CSS, and theme architecture.

EXISTING ARCHITECTURE

Current hierarchy:

sections/header.liquid

→ snippets/ecombio-header-icons.liquid

→ snippets/ecombio-header-icon-store.liquid

→ snippets/ecombio-header-icon-account.liquid

→ snippets/ecombio-header-icon-cart.liquid

Current cart icon snippet:

snippets/ecombio-header-icon-cart.liquid

Currently renders:

- Cart icon
- Cart badge count
- Cart link

This snippet is a leaf component.

CRITICAL ARCHITECTURE RULES

DO NOT:

- Put cart drawer markup inside `ecombio-header-icon-cart.liquid`
- Put cart business logic inside `ecombio-header-icon-cart.liquid`
- Assume Shopify Dawn architecture
- Create Dawn files
- Create `main-cart-items.liquid`
- Create `cart-notification.liquid`
- Create Dawn-specific cart systems

DO NOT RESTRUCTURE THEME ARCHITECTURE.

Respect the existing ECOMBIO structure.

CART ICON RESPONSIBILITY

`ecombio-header-icon-cart.liquid` should only:

- Render icon
- Render badge count
- Provide drawer trigger

Example responsibility:

Open Cart Drawer

Nothing else.

REQUIRED NEW FILES

Create:

`snippets/ecombio-cart-drawer.liquid`

`assets/ecombio-cart.js`

`assets/ecombio-cart-drawer.css`

`assets/ecombio-cart-upsell.js`

If additional files are required, explain why.

HEADER INTEGRATION

Modify:

sections/header.liquid

Render:

```
{% render 'ecombio-cart-drawer' %}
```

at the appropriate level.

The drawer should be owned by the Header Section.

The drawer should NOT be rendered from:

- ecombio-header-icons.liquid
- ecombio-header-icon-cart.liquid

SHOPIFY REQUIREMENTS

Use Shopify AJAX Cart APIs.

Required endpoints:

/cart.js

/cart/add.js

/cart/change.js

/cart/update.js

Do not use deprecated APIs.

CART DRAWER BEHAVIOR

Trigger #1

User clicks cart icon

Result:

Open drawer

Trigger #2

User adds item to cart via AJAX

Result:

Open drawer automatically

Trigger #3

User updates cart quantity

Result:

Drawer updates dynamically

No page refresh

Trigger #4

User removes item

Result:

Drawer updates dynamically

No page refresh

CART DRAWER CONTENTS

Must include:

Cart Items

Product image

Product title

Variant

Price

Quantity controls

Remove button

Cart Summary

Subtotal

Discounts

Savings

Estimated shipping messaging

Free Shipping Progress Bar

Example:

"You are \$18.40 away from free shipping"

Updates dynamically

Upsell Area

Frequently Bought Together

Cross-sells

Bundles

Future AI recommendations placeholder

Must be modular

Drawer Footer

Continue To Checkout button

Continue Shopping button

Close Drawer button

CHECKOUT FUNNEL

Required funnel:

Add To Cart

↓

Cart Drawer

↓

Pre-Checkout Upsell Page

↓

Shopify Checkout

IMPORTANT

Do NOT send users directly to Shopify Checkout from the cart drawer.

The checkout button should route to:

/pages/cart-upsell

This page will become Stage 2.

PRE-CHECKOUT UPSELL PAGE

Prepare architecture for:

pages/cart-upsell

Capabilities:

Cart Summary

Recommended Add-ons

Bundles

Warranty Offers

Subscription Offers

One-click add to cart

Accept Offer & Continue

Skip & Continue

Proceed to Shopify Checkout

SETTINGS ARCHITECTURE

Create theme settings for:

Enable Cart Drawer

Enable Upsells

Enable Free Shipping Bar

Enable Cart Recommendations

Enable AI Recommendations

Enable Pre-Checkout Upsell Page

ANALYTICS EVENTS

Track:

Cart Drawer Open

Cart Drawer Close

Cart Drawer Checkout Click

Upsell Viewed

Upsell Added

Upsell Removed

Upsell Accepted

Upsell Rejected

Checkout Started

NAMING CONVENTIONS

Use ECOMBIO naming:

ecombio-cart-drawer

ecombio-cart-item

ecombio-cart-summary

ecombio-cart-upsell

ecombio-cart-progress

ecombio-cart-checkout

Avoid generic naming.

MOBILE REQUIREMENTS

Mobile-first.

Drawer slides from right.

Responsive:

Mobile

Tablet

Desktop

Touch friendly.

ACCESSIBILITY

Keyboard navigation

Focus trapping

Escape key closes drawer

ARIA labels

Screen reader support

REQUIRED OUTPUT FORMAT

Output in this order:

1. Architecture Overview
2. Modified header.liquid
3. Modified ecombio-header-icon-cart.liquid
4. New ecombio-cart-drawer.liquid
5. New ecombio-cart.js
6. New ecombio-cart-drawer.css
7. Theme Settings Schema
8. Integration Instructions

9. Testing Checklist

Generate production-ready code.
